NHS Priority Challenge:
Developing Tools To Prevent Avoidable Admissions

Data range for infographic: 01.10.2021-30.09.2022
**Other extended time periods are available on request**

A highly granular dataset of 503,154 Emergency Department presentations curated by PIONEER, working with HDR-UK. The data includes admission details, demography, presenting symptoms, serial physiology and acuity, investigations, treatments, and outcomes.
Demographic

The dataset includes:
- Young adults **23%** (ages 0-24)
- Adults **45%** (ages 25-64)
- Older adults **32%** (ages 65+)

Based on the index of multiple deprivation map, **42%** of the population are from most deprived areas and **11%** of patients are from least deprived areas.

17%	4%	3%	57%	4%	15%
Asian	Black African Caribbean	Mixed	White	Other	Not Stated

A&E chief complaint

78K	42K	39K
Injury	Circulation / chest	Gastro-intestinal

33K	31K	27K
General	Airway / Breathing	Musculo-skeletal

Diagnoses

32K admissions are diagnosed with seasonal respiratory infections and **10K** admissions had seasonal chronic exacerbations.
The top 3 inpatient admission reasons are:
- community acquire pneumonia, **14K** admissions
- Low risk chest pain, **12K** admissions
- Urinary tract infection, **7K** admissions

Other chief complaints and diagnoses are available.

139K	4059	195K
None	Non-urgent	Urgent

A&E investigations

Over **1M** investigations recorded in A&E with the average number of investigations done being **3**. The main urgent investigation is an X-ray.

| 93K	58K	174K
None	Non-urgent	Urgent

A&E treatment

Over **614K** treatments recorded in A&E with the average number of treatments done being **1**. The main urgent treatment is Cardiac monitoring.

Inpatient care

- **503,154 Hospitalised admissions;** containing **263,937** unique patients admitted to hospital
- **834K** days worth of hospital data with an average in-hospital length of stay of 8 days
- In-hospital mortality rate of 4% and 3% of admissions discharged to a care home
- The average number of comorbidities the patient is diagnosed with is 9 with a median of 8

Inpatient procedures

More than **348K** in-patient procedure recorded with the average number of procedure being **1**. The main procedure recorded is a CT scan of the head.

Other inpatient procedures are available.

Discharge

2% of A&E attendances are discharged to urgent care and **94%** of A&E attendances are discharged to residence. **91%** of inpatient admissions are discharged to residence.
